## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,2,4-8,17,18 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 994 in view of Nguyen et al. WO teaches the claimed subject matter except for showing use of chamber for the work system. However as set forth in Nguyen, it is conventional to use a chamber in a similar coating system and use of the same effectively treats the work. In view of this teaching it would have been obvious to modify the WO system to use a chamber to house the torch during the coating since use of the same will more effectively coat the work.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 994 in view of Nguyen as applied to claims 1,2,4-8,17,18 above, and further in view of WO 316'.

In view of Wo 316' showing use of a mixer at the outlet of the reservoirs as conventional and beneficial to the coating process, it would have been obvious to modify the Wo 994' system with the same , to enhance to quality of the thermal spray system.

### ***Allowable Subject Matter***

Claims 9-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach the claimed solution channel and air cap structure set forth in claims 9-16.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jinks, Kawabara et al, Huang et al and Berry et al are cited for disclosing pertinent coating systems.
